SHCOOL'S PROJECT

Contact Management System Project

Development of a contact management system in a team using the Scrum method. Project management was conducted through two-hour sprints and sprint reviews to adjust priorities.

CSR Project

Creation of a team website to promote a company's CSR (Corporate Social Responsibility) initiatives, using HTML and CSS.

Static Web Project

Development of a static website in Java, focused on reading and writing files to generate HTML pages. Adhered to delivery deadlines to ensure timely project delivery.

PERSONAL PROJECT

Password Generator

Development of a Java application to generate secure passwords. The application allows the user to specify the length and types of characters (uppercase letters, lowercase letters, digits, symbols) to include. The generated passwords are saved to a text file.
